

Mobile Treatment Services

Frequently Asked Questions

What is Mobile Treatment Services (MTS)?

Mobile Treatment Services (MTS) is an Evidence-Based Practice Model designed to provide care to individuals who are diagnosed with a severe mental illness or co-occurring disorders and who have not had their needs met by traditional mental health service systems. The MTS Practice model provides comprehensive treatment, rehabilitation and support services that are flexible, and person centered. Services are provided to you by a multi-disciplinary team.

What makes the MTS model different from more traditional service models?

The MTS team seeks to serve individuals diagnosed with complex persistent mental health disorders. These individuals often need a very intense level of service provision. The MTS team provides services to you 24 hours a day, 7 days a week, and 365 days a year. Team members provide services throughout the community, in your natural living setting, when and where needed. A low staff to client ratio is maintained to ensure you are provided with the individualized service you need. (1:10)

Who makes up the MTS Team?

Team members from the fields of psychiatry, nursing, counseling, social work, substance abuse recovery, vocational rehabilitation and peer support collaborate to deliver goal oriented services that focus on symptom stability, rehabilitation, and achieving the highest level of functioning possible. Team members include a psychiatrist, a program director, a mental health practitioners, a co-occurring specialist, a registered nurse, a vocational specialist, and a peer support specialist. Our staff members are skilled in working with people who have a serious and persistent mental health disorder or a co-occurring disorder.

Describe some of the services provided by the MTS Team.

MTS services include:

1. Medication management
2. Psychoeducation for you and your family
3. Substance Abuse Treatment
4. Individual Supportive Therapy and psychotherapy
5. Crisis Intervention

Who is eligible for Mobile Treatment Services? (According to COMAR Regulations)

1. An individual 18 years old or older
2. An individual with a serious mental health disorder (priority population diagnosis) who has been unable or unwilling to use community mental health services on a continuing basis.
3. An individual who is in an institution or inpatient facility and would be able to reside in a community setting if the individual received MTS, and other appropriate support services.
4. An individual who has a willingness to participate in MTS.
5. An individual who is homeless or is at-risk for homelessness.

Mobile Treatment Services

Frequently Asked Questions

How does the MTS get paid for the services they provide?

MTS are paid through a monthly rate that is reimbursed through Medicaid and Medicare/Medicaid or State General funds for those clients who are uninsured. There is no cost to you for this service.

Can I continue to have PRP services when I am receiving MTS?

Unfortunately, no. The MTS team will be providing all of the services that you will be authorized for by Value Options.
